

Test Document for Quiz Generation

This is a sample educational document about renewable energy.

Solar Energy:

Solar energy is the radiant light and heat from the Sun that is harnessed using various technologies.

Wind Energy:

Wind energy is generated by using wind turbines to convert the kinetic energy of moving air into electricity.

Hydroelectric Power:

Hydroelectric power is generated by using the force of flowing or falling water to turn turbines connected to generators.

Environmental Benefits:

Renewable energy sources like solar, wind, and hydroelectric power help reduce greenhouse gas emissions and combat climate change.
